

Samco's Strut Material Handling Nester and Bundler can be retrofitted to existing Strut Lines

The Automatic Strut Material Handling Nester and Bundler can be added to an existing strut line to maximize packaging efficiency. Like all Samco products and components, it is designed and engineered for high volume and high quality.

Key Features include:

- Nesting strut profiles from 13/16" to 3-1/4" high;
- Creating mini-bundles of up to 10 pieces;
- Creating stacks of mini-bundles ready for strapping;
- Automatically inserting wood blocks and straps into bundles, ready to ship;
- Easily integrating into a SAMCO strut rollforming system as an option for maximum productivity;

Benefits Include:

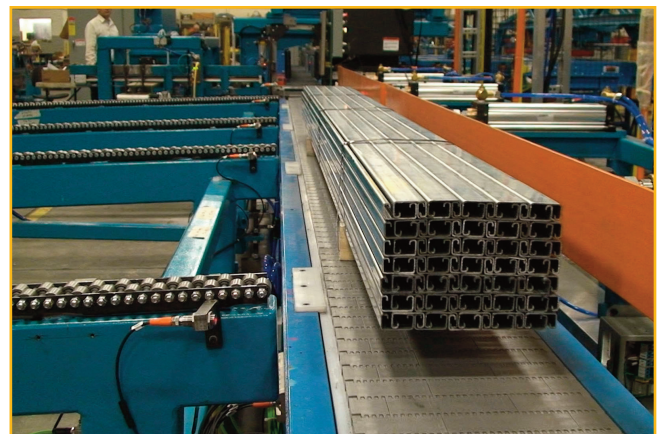

- Handling a wide range of profile heights for maximum production flexibility;
- Handling 10 & 20 ft profile lengths in same equipment with a push of a button;
- Product is ready to be moved by forklift for shipping with minimal operator involvement;
